TECHNICAL SKILLS

Languages/Technologies: MERN stack (MongoDB, Express, React, Nodejs), JavaScript, HTML, CSS, SQL, Mongoose, MySQL, Handlebars, and jQuery

Applications: Visual Studio Code, Sublime Text, Postman, mySQL

PROJECTS

GitFit | <https://github.com/SamuelPai/project-2> | <https://gitfitapp.herokuapp.com/>

- This quick and easy-to-use app calculates common fitness measurements based on user information and then gives recommendations for caloric intake and macronutrients based on the user's goal. Example workout plans are also available.
- Responsible for creating form and submit button functionality. I also helped with the calculations
- JavaScript, CSS, HTML, Node, MySQL, and Handlebars

AnimalGifs | <https://github.com/asanscha/animalGifs> |

- This app generates a page of animal gifs depending on which animal is clicked on. Users can also search and add their own animals
- I was responsible for creating the entire project using: JavaScript, CSS, HTML, and API work

LIRI Bot | <https://github.com/asanscha/LIRI> |

- LIRI is a Language Interpretation and Recognition Interface. LIRI is a command line node app that takes in parameters and gives you back data. It returns information about four categories of data: song information from Spotify, movie information from OMDb, concert information from Bands In Town, and random information from a random text file.
- Technologies used: JavaScript, CSS, HTML, Node, API, Express, and JSON

EXPERIENCE

Document Specialist II - Quality Department

October 2018 - Present

Access Biologicals, LLC

Vista, CA

- Process and gather documents for shipping blood and plasma products domestically and internationally. Create custom Certificates of Analysis for various products. Review batch records and shipping documents for other team members. Create labels for product containers. Work with multiple departments to get product shipped in a timely manner

Key Accomplishments:

- Created custom certificate and label templates for customers and their custom-manufactured products.

Lead Accessioner/Quality Control Associate - Laboratory Operations

November 2014 - August 2018

Exagen Diagnostics

Vista, CA

- Processed hundreds of incoming blood samples daily in a highly regulated facility. Created and updated patient information within the laboratory information system. Responsible for the final quality check of other accessioners' data entry. Performed basic laboratory procedures, including: aliquoting blood and serum samples, cell lysate preparation, and reagent preparation.
